

Dugout

Dugouts are required by players, coaches and technical staff when they are on field. Our modular dugouts are unique in their design, made with strong materials to give extra strength and are very functional keeping in mind the players & staffs requirements.

SPECIFICATION

Structure fabricated from MS tube having minimum dimension of 50 x 50 mm Square Tube detachable framework with powder coated matt finish.

The height of the dugout will be 2.05 meter at front side, Curved surface roof and 2.6 mtr length for 5 seater and 5.1mtr length for 10 seater.

The structure will be covered with 3mm thick transparent or colored polycarbonate sheet on top and two sides.

Wheel Assembly - Solid nylon / rubber wheels attached to dugout for easy movement without any damage to the sports field.
